JiveTurkey Tech
(2015-2016)
Phasellus vitae turpis consequat, pharetra arcu sed, condimentum mi. Suspendisse.

Education

College of Brilliant Devs

(2009-2013)
BA in Computer Science

Skills

Skills

C++JavaJavaScriptPython

Goals

My passion for cannabis science and culture has given me the goal of reaching as many people as possible, through educations, and activism, to help shed light on the healing properties of cannabis. I have collected substantial amounts of data on strains, cannabinoid ratios, terpene profiles, methods of consumption, marketing demographics, and integration of cannabis with healthy, wellness, and exercise. Instead of patients becoming frustrated through months or years of trial and error as they navigate a vast market that continues to increase in scppe and complexity, I want to save people time, money, and resources, so they can find the medicines that are right for their specific wellness needs, as well as providing them with knowledge on how to incorporate these medicines into their lives in a safe and effective way.

Achievements

-Dean's list 2015-2016
-Forbes 20 under 20 2017
-Little Lebowski Urban Achiever 2008

Baker Technologies

The perfect recipe for a successful dispensary

In our own words:

Summary

At Baker, we believe the cannabis shopping experience should be as comfortable and personalized as it is in every other retail environment. Unfortunately, because of strict policy and antiquated technology, business owners have been caught in a race to the bottom, forced to slash prices just to stay competitive. With expertise in retail, technology and cannabis we have

Summary

At Baker, we believe the cannabis shopping experience should be as comfortable and personalized as it is in every other retail environment. Unfortunately, because of strict policy and antiquated technology, business owners have been caught in a race to the bottom, forced to slash prices just to stay competitive. With expertise in retail, technology and cannabis we have created an industry-specific tool that allows dispensaries and brands to engage with customers and build brand loyalty through a personalized shopping experience.
